EXPERIENCE

React Native Developer (Intern)
Abstinent Research & Technology, Bhopal

03/2024 - 06/2024   *Bhopal*

Tasks

- I worked as a React native Developer at Abstinent Research & Technology, Bhopal. I worked on two project 1. EMRS and 2. Grocery application both were based on React native, my role was to responsive UI and API integration.I learn many things but main skills are make responsive UI, integrate API, API Testing, Navigation, Vector icon, async storage etc.

React js developer
Maitretech solution

07/2024 - Present   *Bhopal, Madhya Pradesh*

Achievements/Tasks

- I worked on many projects like bhopal acedmy site, shrina niketan hr sec school site, and more. My role was frontend development. I worked on react js and next js as well for developing web pages.

PROJECTS

PG Life
- PG Life is a Full-Stack Web Application. This is a project that I was assigned to make during my Internshala Full Stack Web Development Internship Training. I got the guidance, and following that I made this web application with my own undertsnading and knowledge. It is customized according to what I thought would be better functionalities in this app, from the user perspective.

Grochouse Application
- The Grochouse Mobile Application, developed with React Native, enhances the grocery shopping experience through seamless navigation, efficient FlatList rendering, and custom modals. Utilizing library stylesheets for consistent design and robust API integration for real-time updates, the app ensures fresh and relevant content. Comprehensive API testing guarantees reliable and secure data transactions.

viracore.launchmysite.in
- Viracore is inter-linked network of individuals, groups, and societies around the world. Viracore provides the platform to communicate and know more about groups in the world. I used next js, javascript and tailwind CSS for developing this site. You can also check live project on click project name or can type to check.

navniketan.launchmysite.in
- Shri nav niketan is higher secondary school. I worked on that site. I used next js, javascript and Tailwind CSS. And also connected it to CMS for backend or for API integration. You can also check live project on click project name or can type to check.
